

## Next steps

**by the end of the year, provide key actions/activities to advance newborn health in your country in relation to these three areas:**

1. To provide a forum for countries to identify their bottlenecks, challenges and solutions and actions to accelerate the scale up of newborn programmes in national plans;
2. To review and provide input to the global Every Newborn action plan draft document;
3. To contribute to the advocacy movement around global, regional and national newborn action and ensure country-level alignment with other key initiatives and political processes

# Next steps - Nigeria
