After applying CHX, apply nothing on the cord and keep the cord clean and dry.

Use of 4% Chlorhexidine to prevent infection in newborn babies:

- CHX can prevent cord infection in newborn babies
- Apply CHX immediately after cord cutting
- Single application is adequate

Use the content of the entire tube:

- Wash hands properly with soap and water before application of CHX
- Apply CHX on the stump and the surrounding areas of the cord

4% Chlorhexidine Gel (Navi Malam)
